

**The Northeast Region of ASH-Delaware Valley performed blood pressure and cardiovascular risk screening at the Annual Lackawanna Medical Society's Health Fair on June 13, 2009 at Nay Aug Park. About 1000 people attended the fair, and with the assistance of Physician Assistant students from Marywood University, 142 blood pressures were taken and 94 cardiovascular risk assessments were performed with advice on ways to lower risk. We plan to make this an annual event, and this was the second year that the ASH-Delaware Valley has sponsored a booth.**
